

2<sup>nd</sup> November 2020.

To whom it may concern,  
I am the Maintenance Manager for the Air side of the SSP UK Business and have worked with AFML now for over 11 years. During this time they have provided me with exceptional support service for all Building Fabric and Electrical Compliance works across our London Airports. They have been on hand to help and advise on both design and installation works also handling all Client Audit raised issues, ensuring a speedy return to fully Compliant Operations.

Airports are a challenging environment to work in and are constantly renewing their onsite Permit to Work Processes, generally at very short notice and in reaction to some kind of security incident somewhere in the world. This has never proved to be too big an issue to AFML or their Admin support teams, with them reacting immediately to whatever changes are being imposed and them being dealt with quickly and professionally, ensuring minimum disruption to our Operational Services.

I have total and absolute confidence in their services and would recommend them as a first class, professional and customer focused outfit.

Best Regard's,

**Kieron Stirrup**
